FOR IMMEDIATE RELEASE

### **Bohr Electronics Secures Multimillion Dollar Contracts for Locomotive Rebuild Programs**

**CHATTANOOGA, Tenn., December 6, 2023** – Bohr Electronics has been awarded multiple million-dollar contracts to supply fully furnished electrical cabinets for Class I railroad operators' locomotive rebuild programs starting in 2024. The details of the clients remain confidential.

The contracts involve complete electrical cabinet rebuilds, which include installing new equipment, refurbished components, and control and power cabling into new or rebuilt cabinet shells, aligning with Bohr Electronics' strategic goals and expertise.

Bohr Electronics electrical cabinets are designed to safeguard sensitive components and systems from environmental challenges, vibration, shock, and overcurrent. These products meet and exceed original OEM specifications and adhere to ISO 9001:2015 and AAR M-1003 standards.

Dan Marks, CEO of Bohr Electronics, said, "We are honored to be chosen for these significant projects. These contracts are a testament to our team's expertise and commitment to delivering high-quality products. They also strategically position Bohr Electronics for further growth and strengthen our reputation as a key player in the rail industry, setting a solid foundation for future partnerships and opportunities."

###

#### **About Bohr Electronics**

Bohr Electronics, a subsidiary of Alderman Enterprises, specializes in manufacturing and remanufacturing electrical and electro-mechanical locomotive parts and components. With its headquarters in Chattanooga, Tenn., and a production facility in Searcy, Ark., the company has served the rail industry since 1957. Bohr Electronics partners with Class I's, regionals, shortlines, and passenger rail, offering a variety of in-cab locomotive electronics from fuel transfer pump repairs to refurbished electrical cabinets.
