

Reliable Air Telemetry for Locomotives

The Bohr Electronics | CRM ABM offers a standalone solution with high-pressure transducers and air switches, ensuring seamless integration with our LEAM event recorders for precise FRA-compliant air telemetry.

The ABM ensures reliable collection of key FRA-required air channels, seamlessly integrating with the LEAM event recorders for comprehensive data management.

Standalone Solution

Standalone air transducer and switch array.

Premium Components

Equipped with a high-pressure main reservoir transducer as well as brake pipe and cylinder transducers.

Advanced Integration

Drop-in LEAM event recorder compatibility.

Premium Engineering

Designed for accurate air telemetry.
