## **Edwin Bohr Electronics Acquires K&L Electronics, Expands Locomotive Aftermarket Expertise**

**CHATTANOOGA, Tenn., April 14, 2022** – Edwin Bohr Electronics (EBE) announced the purchase of K&L Electronics, an aftermarket repair specialist based in Searcy, Ark. The acquisition marks an exciting chapter for both companies as they unite to offer expanded capabilities and enhanced services to the rail industry.

Pictured here celebrating the acquisition are Bryan Grillone, CEO of EBE, and Larry and LuAnn Launius, Owners of K&L Electronics. This strategic acquisition strengthens EBE's position in the locomotive aftermarket space, combining the legacy expertise of both entities to deliver unparalleled service and innovation to the industry.

"This acquisition of K&L Electronics marks a strategic milestone in the expansion of EBE's products and services within the rail industry," stated Bryan Grillone, CEO of Edwin Bohr Electronics. "K&L has an esteemed history as a leader in the aftermarket repair segment, and I am excited to add that experience to our organization. Their customer-centric focus and internal culture align closely with EBE, representing exactly what we seek in business partners. We look forward to leveraging the strengths of each organization to bring even better service and increased value to all of our customers."

The combination of Edwin Bohr Electronics and K&L Electronics brings together a broad range of capabilities within the locomotive aftermarket. This acquisition strengthens EBE's ability to support both new product innovations and legacy systems, allowing both companies to better serve their customers and extend their reach within the rail industry.
